QUEST
UNIVERSITY CANADA

Walking Trails Around Campus

- Main Loop - 2km - approx. 25 min.
- University Heights Extension - 1km - approx. 15 min.
- Alternate Forest route - 0.5km - approx. 5 min.

A Graduate Trees

A Quest tradition since its inaugural commencement ceremony, a new sapling is planted after graduation in the spring each year. The trees are planted alongside plaques that are engraved with unique quotations chosen by that year's graduating class.

B The Pollinator Hotel

The Pollinator Hotel is an initiative started by a Quest student who, for their Keystone project, wanted to create a new habitat for bees during a time when natural habitats are being destroyed. The hotel is built using recycled materials; it creates a safe place for bees as they continue to fill their niche in our environment.

C Riverside

Riverside is one of Quest's condo style dormitories that is largely inhabited by third and fourth year students. Unlike other residences, occupants of Riverside sign a lease at the beginning of the year and the occupants choose how to divide the costs. Each room contains a full kitchen and a washer/dryer. This building typically houses six people per condo with three bedrooms and two washrooms.

D Forest

Explore our beautiful forest adjacent to the campus residences. Renowned biking and hiking trails surround the mountains behind Quest: evidence of why Squamish has been coined as Outdoor Recreation Capital of Canada.

BONUS: Carpenter's Son Bridge

To find this bridge (not on the map), simply follow the yellow arrow located on the main walking loop. The trail will lead you into the forest and directly to the bridge. The Carpenter's Son Bridge is a new addition to the surrounding area after the old bridge was deemed structurally unstable. Head out to this bridge over the Kamquam River for a waterfall view.
